

ODS and F-gas Inspection Campaign

Introduction

Certification Europe's Environment and Inspectorate Division carry out environmental services for various local authorities, government bodies and the public sector. We were contracted by the Environmental Protection Agency (EPA) to carry out a campaign for ODS and F-gas Inspections. The EPA Trading, Chemicals and Producer Responsibility Unit required personnel to assist with the enforcement of ODS and F-gas Regulations through direct communications and site inspections.

Client Requirement

The EPA is the competent authority in Ireland, designated to monitor the ODS and F-Gas regulations with responsibility for ensuring obligated users are compliant with the legislation. We carried out inspections campaign over a 10-month period on behalf of the client to assess compliance with the relevant regulations.

Project Outcomes

From the various inspections, our team produced and presented a report to the EPA which incorporated all data obtained, conclusions drawn and recommendations for future inspection campaigns were made.

Project Summary

Start Date: October 2014

Completion Date: July 2015

Client: The Environmental Protection Agency

Service Delivery

This campaign involved a range of inspections:

- Desktop Inspections
- End-user Site Inspections
- Contractor Inspections

Desktop Inspections

Our team carried out desktop inspections that involved gathering a list of end users across a variety of sectors.

End User Site Inspections

Following the desktop research, end-user site inspections were carried out to verify submitted information.

Contractor Inspections

Inspections were carried out on previously registered contractors.
